Action Swimming Pool and Spa
2660 Youngfield St.
Lakewood, CO 80215

Dear Action Swimming Pool and Spa:

Thank you so much for donating 10 bags of Aqua-Salt to The Children's Hospital for use by our patients with Epidermolysis Bullosa. This is a terrible skin condition in which the anchors that hold the layers of skin together are not present. Therefore, these children have blisters all over their bodies that break down to very painful sores. We have found that adding salt to their baths greatly reduces the discomfort of bathing and helps to promote healing. Many of the patients are very low income and they greatly appreciate receiving the pool salt for free.

Once again, our patients greatly appreciate your generosity and consideration.

Sincerely yours,

Stephen Berman, M.D.
Professor of Pediatrics
Director, Epidermolysis Bullosa Program
The Children's Hospital

P.S. What is the additive in the salt?
